

Network Configuration Options

Standard Solution

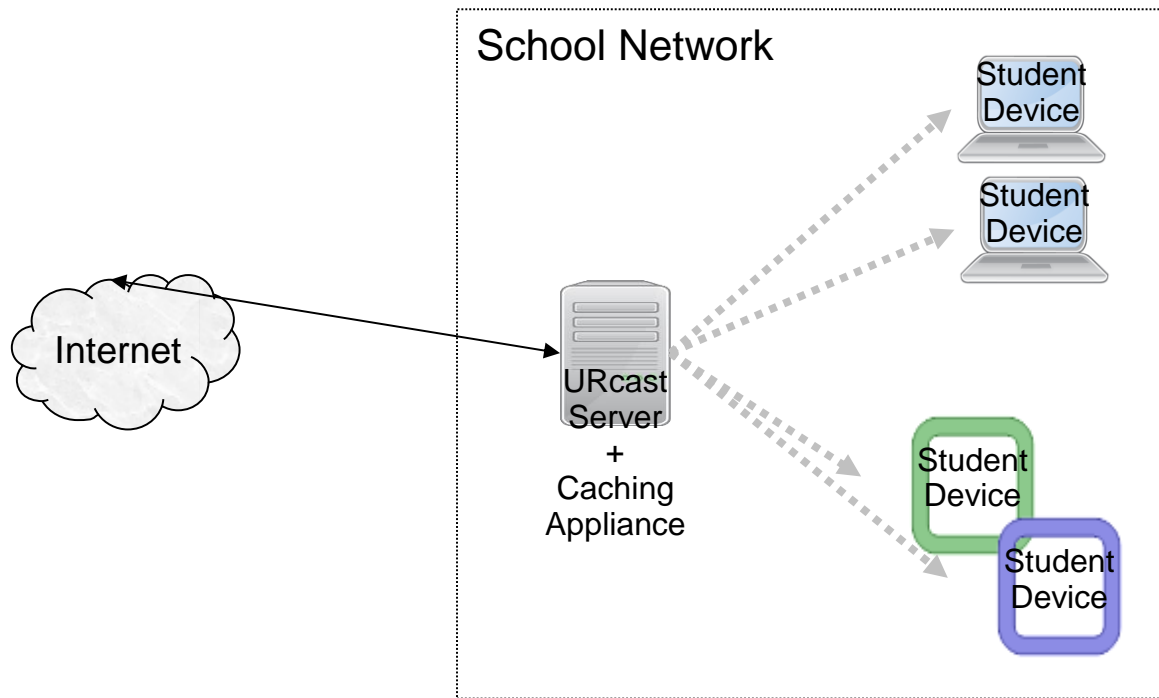

Standard Solution

- One Server in each school
- Multiple Gateways used to deliver to student devices
- Content is replicated from Server to Gateways
- Teachers publish lessons to school Server
- Delivery can be scaled by adding Gateways

All-In-One Solution

All-In-One Solution

- One Server (in school or classroom)
- Gateway runs on Server device and delivers to student devices
- Content is replicated internally
- Teachers publish lessons to single Server
- Limited scalability
